Mobile Apps (iOS & Android) & PWA

Your app on iPhone and Android, from one codebase.

We build iOS and Android apps with React Native and Expo, or a PWA that installs from the browser. Login, payments, notifications and an admin panel, plus the store listing and launch.

Message only

How it works	Built for your users
Best for	AI Engineering & Growth
You stay in control	Published under your own store accounts
First step	A short call with no obligation

How this helps

What it means for your business

Building separate iPhone and Android apps doubles the cost and the time.

Repetitive reading, sorting and writing is prepared for you, so your team starts from a draft instead of a blank page. You check the work before it is used.

What you get

- One codebase for iPhone, Android and web
- Payments and notifications that just work
- An admin panel to run the business
- Store listing and launch handled

What changes day to day

	Common today	With this service
Starting point	A blank page	A prepared draft
Format	Varies by person	Follows the format you set
Unclear items	Easy to miss	Flagged for a person to check
Your time	Spent on repetitive work	Spent on review and decisions
Final say	Your team	Still your team

How it fits with your business

What comes in
Emails and notes
Files or documents
Data from your tools

→

The system
Reads and prepares
Follows your format
Flags unclear items

→

Your team and tools
You review and approve
Saved to your tools where supported
Ready to use

How it works

From start to finish

Step 1
We plan the app
Screens and features written down and priced.

Step 2
We design the screens
Clickable designs you approve.

Step 3
We build and test
Weekly test builds on your own phone.

Step 4
We launch
Store listings, review and release.

Example · Work scene

A pet-sitting business takes bookings by text message and loses track.

Built for your users

What happens next

An app on both stores with booking, payments and chat.

App build

App	Pawlist, pet sitter booking
Platforms	iOS, Android, web
Built	Booking, payments, chat, admin
Stores	App Store and Google Play
Status	Approved and live

How easy it is

We do the heavy lifting

Most of the work happens on our side. You make the decisions, and we tell you exactly what we need.

What we handle

- Agree the format with you
- Connect your tools where supported
- Set the rules and the review step
- Test it on real examples
- Adjust the results after launch

What you do

- Share your rules and examples
- Approve the format
- Review the first results
- Tell us what to change

Service levels

Start simple, go further when you are ready

Level 1

Draft mode

We prepare the work and you approve it before it is used.

Level 2

Connected

Runs with your tools where supported, on the schedule you set.

Level 3

Advanced

More rules, several workflows working together, and reporting.

The right level is confirmed during discovery, based on your business and the tools you use.

What we need from you

- Examples of how the work is done today
- Access to the tools it needs to work with
- The format you want the result in
- Who on your team approves it

How we get started

1. A short call about your business
2. A clear plan and scope
3. Setup and testing with you
4. Go live with your approval

Why Calvyrn

Why businesses choose to work with us

Built for your business
Your rules, your wording and your tools. Not a one-size template.

You approve first
Nothing goes live until you have seen it and said yes.

Start small
Begin with one service or one first version, then add more if it helps.

One team
AI systems, automations, websites and web applications in one place.

Plain language
You always know what is being built, why, and what comes next.

Honest limits
We tell you what a system cannot do and where a person should stay involved.

You stay in control

- Published under your own store accounts
- You test every build on your phone
- You own the code and data

Questions you may have

Does it phone anyone?
No. This service works in writing and makes no phone calls.

Do we need developer accounts?
Yes, in your name: Apple Developer ($99 a year) and Google Play ($25 once). We set up everything inside them.

Why React Native or a PWA?
One codebase serves iPhone, Android and web, so it costs less to build and to keep up to date.

What about App Store review?
We prepare the listing and handle Apple's and Google's review questions until the app is approved.

Important notes

- Examples in this guide use fictional businesses, names and details.
- Results depend on your business, tools, customers and how the service is set up. We do not guarantee revenue, bookings or search rankings.
- AI can make mistakes. That is why approvals, clear limits and human hand-off are part of the setup.
- Features depend on your plan and on the tools you use. The final scope is confirmed during discovery and in your proposal.
- This guide is not legal, medical, tax or financial advice.
